EXPLORE • RESEARCH • CONSERVE

## Cape Giraffe Research Project

Researchers will build a database of individuals using their patterns. Study dispersal using telemetry. Observe foraging and social behaviours on foot. Investigate effects of a disease, habitat loss & climate change on the population.

**Dates** 23 July - 5 August 2023 (in-country dates)

**Duration** 14 Days / 7 days Giraffe Research & 7 days Crocodile Research  
(Option to stay on if time and funds allow)

**Location** Tugela River Camp, KwaZulu Natal, S.A.

**Airport** King Shaka International, Durban

**Contact** Angus Wingfield: [angus@afriawildtrails.com](mailto:angus@afriawildtrails.com)

# Nile Crocodile Research Project

Hands on and close-up contact during the initial crocodile center phase. Wild Nile crocodile research: population dynamics, counts, size study, nesting survey, basking and thermoregulation. Pattern recognition data base.

**Dates**                      **23 July - 5 August 2023 (in-country dates)**

**Duration**                    **14 Days / 7 days Giraffe Research & 7 days Crocodile Research (Option to stay on if time & funds allow)**

**Location**                    **St Lucia & Ndumo Game Reserves, KwaZulu Natal, S.A.**

# High Standards

All Africa Wild Trails operations have been independently assessed against the standards of The Adventure Activities Association, The Expedition Providers Association, and the Duke of Edinburgh Gold Award. AWT is compliant with the BS8848 British Standard for international expeditions, ventures, and research and compliant with the LOtC Quality Badge for learning outside the classroom, specific to international learning.
